

# **Belgravia Hartford enters into Letter of Intent with Parallel Logic Corporation to Combine on the Launch of Ethpar Blockchain & Tokens**

Toronto, Ontario--(Newsfile Corp. – April 8, 2025) - BELGRAVIA HARTFORD CAPITAL INC. (CSE:BLGV) (OTC:BLGVF) ("**Company**") is pleased to announce that, effective April 8, 2025, it has entered into a non-binding letter of intent ("**LOI**") with Parallel Logic Corporation ("**PLC**") to create a multiplatform partnership for the launch of Ethpar blockchain ("**Ethpar Blockchain**") and its related Tokens ("**Ethpar Tokens**").

## **LOI & Ethpar Partnership**

The partnership between the Company and PLC will be managed by [NodeVest IO Inc.](https://nodevest.io/) ("**NodeVest**"), a wholly-owned subsidiary of the Company <<https://nodevest.io/>>. Pursuant to the LOI, the parties have 90-days to negotiate, in good faith, certain investment agreements ("**Investment Agreements**") setting out the terms and conditions pursuant to which the Company and PLC will exchange Ethpar Tokens for common shares in the capital of the Company in anticipation and coordination with the launch of Ethpar Blockchain and the issuance of Ethpar Tokens to the public. Notably, the LOI states the Investment Agreements will allow the Company first-mover investment position in Ethpar Tokens prior to launch (collectively, "**Transactions**").

## **Ethpar Blockchain**

Dr. Victor Cook, Founder and CEO of PLC explains: "Ethpar Blockchain is a hard fork of Ethereum. Every contract, every token, every transaction from legacy Ethereum is on Ethpar Blockchain, the difference being Ethpar Blockchain scales on *Layer 1* using parallel computing algorithms. Ethpar is Ethereum, updated with the same technology that directs your computer to run multiple applications at the same time. It is that simple."

Dr. Cook added: "Ethpar Blockchain enables features that have been delayed on legacy Ethereum due to infighting and fragmentation. Ethpar permits zero fee transactions, instant transaction finality, defeats toxic extraction of value (MEV) and lets popular apps share network income. Ethpar blockchain adheres to the original vision of Ethereum, a scalable, decentralized world computer."

Dr. Cook further noted: "Ethpar Blockchain is a parallel extension to the native Ethereum blockchain. It is 100% Ethereum network compliant, with nodes that support the same dApps and use the same languages and tooling. Ethpar Blockchain complements Ethereum and is expected to offer up to 100x more throughput and 20x lower transaction fees."

Mehdi Azodi, the CEO of the Company remarked: "Since our initial discussions with Dr. Cook, the Company has been working towards a potential combination with PLC as Dr. Cook launches

Ethpar – and we are thrilled to be one of the first and only external investors and supporters of the Ethpar Blockchain.”

More details about the Ethpar Blockchain and our partnership may be found on the NodeVest website, <https://nodevest.io/>.
